I am available to answer any questions you might have about Autism and the interventions that are used to change its course. I actually have two kids on the spectrum myself, so I come at this from both a parent's and doctor's perspective.

What's up Doc?

Nice to finally see you..

BTW. Dr. Mike is working with our son Steven and he has so much knowledge about what is going on inside your child's head. He's very personable, so please ask your questions..

Best regards,  
Lonny

Hi Dr. Mike

What are some of the types of therapies you do? I am looking into giving my child who is autistic vitamin supplements. Are there any that you can recommend?

Missy

Hi. I created a program called Neuro-Enhancement Therapy that uses specific stimulation like sound, light, motion, joint compression, etc. to increase brain function. I also use a nutritional approach that is based on lab tests that we run (like blood and urine).

It is totally individualized for each child.

Tell me about your situation and what you want to accomplish.

Dr. Mike
